

Avtron AVSK Shield Kit

Shield kit to add magnetic shielding to AV56A, AV56S, AV67A, AV85A, AV115 encoders

Magnetic Shield Kits for THIN-LINE™ Encoders

AVSK

Some applications require protection from magnetic fields from DC direct-acting brakes or other magnetic sources.

THIN-LINE encoders have internal electronic protection against common magnetic fields, but extremely high fields can produce signal errors (indicated by a red LED on the encoder).

Super magnetic shielding option 005 for THIN-LINE encoders includes this shielding bundled with the encoder for maximum protection. But for applications where an encoder is already in-place, the AVSK shield kit can be retrofitted to the existing encoder installation, providing magnetic shield protection to the AV56, AV67, AV85 and AV115 models.
