

AVTRON™ ENCODERS

Avtron HS44 Encoders

Rev: 02-01-22

Heavy Mill Duty Magnetic Hollow Shaft Encoder, 12mm- 17mm shaft sizes

The Ideal Wind Generator Encoder!

- | Simple Installation
- | Up to 10000 PPR
- | Replaces Competitive Models without Rewiring
- | High Power Outputs Standard
- | -40°C to +100°C Operation*
- | Fully Insulated from Motor Shaft Currents*
- | 2 Year No-Hassle Warranty
- | No fragile optics, no glass disks
- | All electronics fully potted/encapsulated
- | Cast aluminum heavy duty housing
- | UL Listed; CE Compliant

HS44

The HS44 offers high performance, magnetic durability and moisture resistance in a compact package with drop-in ease of replacement at a great value.

Avtron HS44 encoders are a direct fit for 12mm, 16mm and 17mm (10:1 taper) generator (and motor) center-bolt shaft systems.

The optional ceramic bearings offer high voltage isolation from shaft currents.

The HS44 is engineered to be a drop-in replacement for Baumer Hubner HOG 8, & 9 models, as well as Leine & Linde 861, 862 & 865 models. And it adds superior durability and diagnostics!

Avtron encoders have superior shaft seals and bearings that stay sealed to keep out contamination caused by temperature cycling and liquid sprays.

The HS44 offers high power outputs that can drive cables up to 1000' [300m] with full short circuit and over-voltage protection!

On-board diagnostics check all aspects of the encoder - from the sensor to the output line driver circuit - and provide a clear indicator that the encoder is working well. No more fumbling with a PC or oscilloscope to determine if your encoder is working properly!

Often, optical encoders fail because of dust or water contamination that prevents the sensor from seeing the optical disk. The HS44 advanced magnetic technology sees through contamination. The fully potted circuit board that ignores water, oil, dust and dirt. This ensures your machine keeps working, even in the toughest application environments.

Select an Avtron HS44 and upgrade your machine today!

OUTLINE DRAWING

MORE HS44 ADVANTAGES

- ▮ All digital design; no adjustments or potentiometers required
- ▮ Direct replacement for Hubner HOG 8 & 9 and, Leine & Linde 861, 862, 865, and many others
- ▮ Fits European and Asian generators & motors with 12mm & 16mm straight and 17mm taper shaft center-bolt systems
- ▮ Diagnostic LED & alarm output contact option
- ▮ Grounding (earthing) strap and custom length Anti-Rotation Arms available
- ▮ Fits all major brands and platforms of wind powered generators (WPGs)

HS44 SPECIFICATIONS

Operating Power: Volts: 6-30 VDC; Current: 80mA, no load
Output Format: A Quad B with marker (A, /A, B, /B, Z, /Z)
Frequency Range: 0 to 250 KHz @6V & 1m cable
PPR: 64 - 10000 standard (for other PPR needs, consult factory)
Speed: 6000 RPM Max., (for higher speeds, consult factory)
Temperature: -30° to 85°C std, *optional: -40° to 100°C
Environmental: IP66 housing with fully encapsulated electronics
Shaft Current Isolation: *2700VRMS optional ceramic bearings
Vibration: 10-2000Hz, 17Gs
Shock: 275G, 6mS duration
Axial Bearing Load: 500 N
Radial Bearing Load: 1200 N
Weight: 2.5 lbs. [635 g] approx
Certifications: CE, UL Fire & Safety
